**Date:** 2025-10-28  
**Initials:** SDM

Are you passionate about the design and optimisation of complex load-bearing structures including parametric design and numerical modelling? Then you might be our new junior engineer:

We are looking for a skilled and ambitious engineering student with a passion for calculation and optimization of load-bearing structures, who wants to gather practical experience alongside their studies.

We offer a unique position where you will be challenged both professionally and creatively from day one, and where you will contribute to further developing your own and the company's competencies in structural design. You will work on challenging projects alongside some of the industry's most talented specialists.

### **About us:**

KI is a consulting engineering company centrally located in Copenhagen close to Nørrebro station. Our main competencies and passion are the design and development of load-bearing structures in steel, concrete, and wood, and we work on projects within residential, commercial, industry and infrastructure in Denmark and abroad.

We have an international working environment with a very good social cohesion. We have a culture where knowledge sharing and innovation are highly prioritized, and our employees have good opportunities for great responsibility and personal development. We believe in investing in our employees' ideas and development. We place high demands on ourselves and each other, and we expect you to do the same.

### **Your profile:**

- You are a student at DTU Civil Engineering (Building Design or Building Technology)
- You are either at the end of your bachelor's/diploma programme or in the process of your master's degree
- You are ambitious and thrive in an environment where professionalism and quality are always paramount
- You are proactive, creative and independent

### **Sound like you?**

Then send an application via our website: [www.ki.dk/karriere](http://www.ki.dk/karriere). If you have any questions about the position, you can contact Mia Simonsen by email [mrs@ki.dk](mailto:mrs@ki.dk) or by phone +45 28 40 83 90.
